

IDEA-B Funding

Edgerton Local Schools receives IDEA-B funds annually to help cover the cost of special education. Currently, the school district allocates those funds to cover cost with services for special education with the ESC as well as another local district. The IDEA-B funds make up a small portion of the overall special education cost of the district. The remaining funds come from state and local funding. If anyone would like to make a suggestion about how IDEA-B funds are used at the district, they can do so by attending the August board meeting. The opportunity for the public to comment on the use of IDEA funds will be on the board agenda.
